Ex. 6 - Personal Privacy

Status In Progress

Description Information

Who are you trying to contact? The White House and President Obama

Subject Environmental Protection Agency

Description Dear Mr. President,
My family and I are some of the thousands that have been affected by the chemical spill in West Virginia. We have been told it's safe for us to use our water, but there is new information coming to the surface about the safe threshold for use being way less than 1 ppm. I am outraged and ashamed of the contradictory information that has been fed to us over the last several days. If this is an actual emergency or disaster, then why have we not seen you? We want the truth. We want the answers that everyone seems to be dancing around. No one would even mind that much if we had to continue going without water longer so they can properly do research and fix things. We are just tired of being treated like WE are the research project.
